^ Limits expressed represent usage for only one category. Actual file sizes and user experiences will vary.

*Not available in some areas.

+Speeds require an EV-DO Rev. A-capable device. When using an EV-DO device that is not Rev. A-capable, you can expect download speeds of 400-700 Kbps and upload speeds of 60-80 Kbps. BroadbandAccess speed claims based on our network tests with 5 MB FTP data files, without compression. **VZAccess Manager** will indicate when you're in an EV-DO Rev. A coverage area.

^Text Messaging is \$0.20 per message sent or received (including messages to and from wireless customers in Canada, Mexico and Puerto Rico). International Text Messaging is \$0.25 per message sent and \$0.20 per message received. For PC Card, ExpressCard, USB Modem and BroadbandAccess Built-In notebook devices, if you don't utilize Wireless Internet Access Manager (or an SMS-capable connection manager) you will be billed for text messages that are sent to you, but you will not be able to receive them; text messaging block is available upon request.

¹ There will be a time lag between the end of a data session and the point at which the usage will appear on any of these tools.

² Customers must download the most recent version of **VZAccess Manager** from **vzam.net** for this capability. For Windows, version 6.7 or higher. For Mac OS X, version 4 or higher. When using Intelligent Mobile Hotspot, you must connect with the included USB cable to check your usage in **VZAccess Manager**.

³ When multiple users are connected to the Intelligent Mobile Hotspot, all their data usage will be aggregated and applied to the Mobile Broadband customer's monthly, weekly or daily allowance. Prepaid Mobile Broadband customers who reach their data allowance limit will need to purchase another session through **VZAccess Manager**.
